

GlennAir Airconditioning Installation

Peggy's Place project

Peggy's Place acts as a safe haven for vulnerable women and their children who have transitioned through a refuge but are not quite ready for independent living.

It has doubled the amount of transitional housing available in Brisbane. And also offers programs around work experience and qualifications providing people with greater financial security.

The project was extensively supported by Government, suppliers, tradies and people who donated their time and expertise, including restoring and selling the old convent furniture and donating the sales proceeds.

FutureSteps Support

\$100,000 (ex GST) was donated to this multi-million-dollar conversion to pay for the HVAC across the building which included over 76 rooms.

Further Lendlease support

- ❖ **OHS advice and draft policies** – to assist in the managing of risk in such a large undertaking.
- ❖ **Donation of baby equipment** – through executives at Lendlease.
- ❖ **Connection to project partners** – to provide much needed linen and beds.

Outcomes & Impact

33 rooms

33 women & 45 children at full capacity

\$115,000 in-kind support

Peggy's Place opened in May 2023 and over the next 12 months would build to full capacity.

Residents include young mothers and their children, older women and their children, and single women. It aims to be highly inclusive supporting people from culturally and linguistically diverse backgrounds, indigenous people, and people with disabilities.

People stay anywhere from 3 to 12 months, providing the time and healing space needed for the trauma experienced and to build much needed skills.

Last word from Peggy's Place

“Peggy's Place would like to express our sincere appreciation to LendLease for being a great connection and donor. Lendlease has also been able to provide us with some fantastic connections with other companies and organisations, who were able to support Peggy's Place with donations for baby items and linen. Without the continued support of LendLease over the previous 12 months, our service would not be at the standard to meet our trauma responsive frameworks.” - **Vicki Cole, Business Manager.**
